Dear Parents,

We at MES Indian School are delighted to introduce our new Bus Tracking and Student Safety Solution System, designed to enhance the safety and security of our students during their daily commute.

This advanced system enables parents and school officials to monitor the real-time location of school buses and track student check-in and check-out activities with accurate timestamps.

To further strengthen student safety, each bus is equipped with a Human Presence Detection (HPD) system. Once all students have disembarked, the HPD system is automatically activated. In the event that a student has not checked out from the bus and the driver switches off the ignition, the system will immediately send a warning alert to designated school officials for prompt action.

At MES, student safety is our highest priority. With this technology, we are taking another important step towards ensuring a safe, secure, and reliable transportation experience for every child.
